

AI ACCELERATION SPRINT

GOVERNANCE-AWARE AI INTEGRATION FOR REGULATED & PROFESSIONAL SERVICES FIRMS

OVERVIEW

Most organizations experimenting with AI are adding tools without redesigning workflows. The result: scattered pilots, compliance risk, inconsistent quality, and minimal measurable leverage.

The AI Acceleration Sprint is a focused 2–4 week engagement designed to identify, architect, and implement high-impact AI workflows with governance, traceability, and human oversight built in from the start.

Experimenting until you get it right takes time. This is structured implementation designed to get *results*.

WHO THIS IS FOR

- Accounting, legal, financial services, insurance, and other regulated firms
 - Professional services organizations seeking measurable efficiency gains
 - Leadership teams who want AI leverage without regulatory or reputational exposure
-

WHAT WE DELIVER (2–4 WEEKS)

1. *WORKFLOW & LEVERAGE AUDIT*

- Identify operational drag and repetitive cognitive load
- Map decision bottlenecks and manual process friction
- Evaluate AI suitability and risk surface

2. *AI ARCHITECTURE BLUEPRINT*

- Design governance-aware AI workflows
- Define human-in-the-loop controls
- Establish traceability, logging, and review standards
- Align with compliance and risk posture

3. *LIVE AUTOMATION IMPLEMENTATION*

- Deploy 2–3 production-ready AI-enabled workflows
- Configure orchestration using tools such as Claude, ChatGPT, automation platforms, or custom scripting

- Document operational and oversight procedures

4. *TEAM ENABLEMENT SESSION*

- Practical training on safe AI usage
 - Decision frameworks for future AI adoption
 - Guardrails to prevent drift, shadow tooling, or unmanaged risk
-

OUTCOMES

- Immediate measurable time savings
 - Reduced cognitive load on senior staff
 - Clear AI governance posture
 - Repeatable framework for scaling AI safely
 - Executive clarity on next-phase AI investment
-

WHY ME

- 17 years as CIO in a regulated accounting environment
- Deep security architecture and compliance experience (CISSP, GIAC honors)
- Hands-on AI systems design and orchestration development
- Executive communication fluency across technical and board-level audiences

I bridge legacy infrastructure, risk-aware governance, and AI-native execution.

ENGAGEMENT MODEL

- Fixed-fee sprint (typically \$5K–\$12K depending on scope)
 - Clear deliverables and measurable outcomes
 - Designed to stand alone or transition into ongoing advisory support
-

If your organization is exploring AI seriously and wants structure instead of experimentation, let's schedule a 30-minute conversation to determine fit.
