

Loop-Based Presence Platform \ *Bringing Consent-Aware Interactivity to Toys, Locations, and Digital Worlds*

Overview \ We are building a symbolic infrastructure layer that transforms physical presence and relationships into digital trust loops. Using lightweight, privacy-first technology, we enable toys, kiosks, and games to recognize real-world interaction and unlock context-aware functionality.

Core Capabilities

- **Loop Protocol:** Establishes mutual, time-bound trust relationships between any two entities (e.g., user-to-toy, visitor-to-site, player-to-player).
 - **Consent Framework:** Ensures all interactions are explicit, opt-in, and reversible—protecting users while deepening engagement.
 - **Memory-Enabled Tokens:** NFC and ESP32-powered devices that store encrypted symbolic data and verify co-presence.
 - **Cross-Platform Activation:** Loops bridge real-world interactions into digital ecosystems like Roblox or branded mobile apps.
-

Sample Applications

- **Pairable Toys:** Two dolls “loop” to unlock new behaviors, voices, or stories.
 - **Location Anchors:** Visitors tap a kiosk or ritual node to prove presence, unlocking content, collectibles, or experiences.
 - **Digital Crossovers:** Real-world loops trigger virtual unlocks—exclusive Roblox rooms, missions, or co-op features.
-

Why It Matters Consumers seek meaningful, safe, and interactive experiences. Brands seek verifiable engagement and loyalty. Our technology offers:

- **Privacy-first presence verification**
 - **Symbolic engagement without surveillance**
 - **Persistent memory of user interaction**
 - **Customizable rituals for brand storytelling**
-

Go-to-Market Strategy

- Co-develop with toy manufacturers, experience designers, and gaming platforms
- License SDKs + hardware templates (charms, kiosks, tags)
- Monetize symbolic tokens and digital upgrades through branded ecosystems

Ideal Partners Toy brands, cultural institutions, digital platforms, retail innovators, and Web3 builders looking to activate real-world presence in immersive and trusted ways.

Let's Loop the World We're turning every object, place, and moment into a node of trust and story.\ **Now seeking strategic partners to launch the next generation of symbolic, consent-driven play.**
